SKILLS:

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3, Ruby
Frameworks & Libraries: React.js, Vue.js (v2 & v3), Redux, Express.js, Rails
Tools & Technologies: GraphQL, Apollo, Webpack, AWS, Firebase, RESTful APIs
Testing: Vitest, Playwright
Development Practices: Agile, Test-Driven Development (TDD), Responsive Design

EXPERIENCE:

UI Engineer — Apple Inc.
Dec 2024 - Feb 2025 · Contract

- Developed and implemented internal tools utilizing Vue.js and TypeScript, enhancing team efficiency and productivity.

Front End Developer — Zendesk
June 2021 - Nov 2024 · Full-time

- Engineered custom front-end solutions for Global Professional Services, increasing client satisfaction by 35% through tailored Vue.js and JavaScript implementations
- Developed and integrated third-party API solutions that improved application scalability, reducing integration time by 40% and enhancing system security
- Optimized frontend architecture, achieving 25% faster page load times and improving application responsiveness through strategic data structure implementation
- Collaborated cross-functionally with engineering and UX teams to deliver 12+ custom client applications, consistently meeting complex requirements and design specifications

Freelance Web Developer — Chang & Associates Behavioral Consulting
Sept 2020 - Oct 2021 · Contract

- Website for behavioral therapy intervention for children with autism and the impact on their family
- Utilized TailwindCSS for quick prototyping and maintaining a robust, maintainable CSS structure, resulting in faster development times and easier updates

PROJECTS:

Earthflix
May 2019 - Aug 2019

Developed a full-stack nature media streaming platform using Ruby on Rails and React Redux

- Implemented AWS S3 integration for scalable media storage, supporting 1.5 GB of content with potential for horizontal scaling
- Utilized advanced state management techniques with Redux, ensuring predictable application state and optimized rendering
- Designed responsive web components with custom media playback functionality

EDUCATION:

Full–Stack Software Engineering – App Academy
2019

- Completed intensive program covering Test-Driven Development, scalable architecture, algorithms, and web development methodologies and best practices

Materials Engineering – San Jose State University
2018

- Academic background in technical problem-solving and analytical thinking
- Have taken a sabbatical from formal education to pivot careers.
